

TIPH in Hebron (TIPH) asked for DoubleExit Escape Systems

By Cobi Bitton

Dated: Nov 02, 2009

The Temporary International Presence in Hebron (TIPH) is in the process of improving the escape ways at TIPH Headquarter in Hebron. After doing intensive research, the TIPH asked DoubleExit Escape Systems for a contract.

The Temporary International Presence in Hebron (TIPH) is in the process of improving the escape ways at TIPH Headquarter in Hebron. After doing intensive research, the TIPH asked DoubleExit Escape Systems for a contract to supply and install DoubleExit Building Emergency Escape Systems.

General:

The TIPH base is an 8 storey building. From ground floor to the 5th floor has the building two internal escape staircases but both are unfortunately located in the centre of the building. Supplemental Escape systems are in need and TIPH found DoubleExit as the best and preferred escape systems. The 6th and 7th floors have only 1 escape staircase which are the main concern.

This recognition at DoubleExit innovated escape system by International organization contribute to the awareness issue by National, Federal, Home Land Security and private sector authorities to re-evaluate emergency preparedness and safety issues.

DoubleExit Rescue & Evacuation Solutions is a company specialized in the design; production and marketing of innovated building emergency escape systems based on technology of controlled descent. The company also specialized in design of special escape composed cab led for safe and secure evacuation process. DoubleExit products are patented and worldwide certificated.

The company representative is part of international standardization committees such as the ASTM and the NFPA for the development and improvement of safety standards and codes.

Escape Systems by DoubleExit approved by Moscow Police HQ

By Cobi Bitton, DoubleExit Rescue

Dated: Oct 11, 2009

DoubleExit Escape Systems approved by the Police HQ of Moscow in Russia to be installed at their offices. The process was held by DoubleExit representative in Russia, ESTA-MCK, based in Moscow.

DoubleExit Escape Systems approved by the Police HQ of Moscow in Russia to be installed at their offices. The process was held by DoubleExit representative in Russia, ESTA-MCK, based in Moscow.

The DoubleExit innovated escape system, Type DE1002, was part of a bid which the Moscow police officers were evaluating among others and found as the most, safe, friendly, secure system in its kind: Controlled Descent Devices.

Few of the DE1002 escape systems were installed in offices of the Moscow Police HQ as secondary means of egress to ensure safe evacuation, part of emergency Preparedness procedure.

Israel National Emergency Authority to consider Supplemental Emergency Evacuation Solutions

By DoubleExit - Cobi Bitton

Dated: Oct 30, 2009

Israel National Emergency Preparedness Authority to consider implementation of supplemental Escape and Evacuation Devices and Systems, Part of the new home front protection regulation.

As Israel leads its emergency preparedness activities, the Israel National Emergency Preparedness Authority to consider implementation of supplemental Escape and Evacuation Devices and Systems, Part of the new home front protection regulation.

The initiative came from few of Israeli manufacturers of escape systems with the recommendation of the head of the National Earthquake Preparedness Committee and the Israel Fire & Rescue Services so to develop a standard and regulation of such solutions in multi-story buildings that are with only single escape stair case for increasing the odds of safe evacuation of people in case of emergency.

Such action will lead Israel and its innovative and progress industry of supplemental evacuation products to a new level.

The Israeli industry of innovative manufactured escape and evacuation devices and systems already well known and the Israeli industry leads this world of products by using best efforts to bring in international organizations to improve their approach for such concept and to revise national regulations , part of their public safety measurements.
